

Notice of booking process for Lithium Batteries

We are finding incorrectly and/or missing declared dangerous cargo after cargo onboard that eventually harm the safety at terminal, vessels, and related co-workers continuously. However, in the business reality, we found case of cargo containing lithium batteries, it is frequently consolidated with other general cargo. Due to upon reason, we have been checked any commodity may include batteries that arranges consolidation with other commodities properly as follow IMDG regulation. That makes complicated booking and follow up process between Maersk and our valued customer. To solve the complexity of the booking process, please refer to the following guidance when you arrange a booking through Maersk.com or EDI/INTTRA.

The shipper/consignor is fully responsible for correct classification and declaration of his goods.

If we find out any mis-declaration/un-declared of batteries after cargo onboard, then we will charge **as Mis-declaration fee**. And until we will verify commodities and required actions to proceed shipments safely, the cargo may not arrange transfer as planned due to safety reason.

1. Booking through Maersk.com
